Experience

- Social Winter of Code (SWOC) Season 6** — *Open Source Contributor* December 2025 – Present
- Contributing to open-source projects driven by the real-world community under a national open-source program.
 - Collaborating with mentors and contributors through GitHub issues, pull requests, and code reviews.
 - Improving project features, documentation, and code quality while following standard open-source workflows.
- Bharat Sanchar Nigam Limited (BSNL), Patna** — *Trainee* December 2025 – January 2026
- Gained hands-on exposure to telecom network architecture, switching systems, and routing mechanisms.
 - Learned broadband technologies including FTTH, OFC, GSM, mobile communication, and network protocols.
 - Observed real-world network maintenance, troubleshooting, and operational workflows alongside BSNL engineers.
- Tiara Rides (AIC-MUJ Hybrid)** — *AI/ML Intern* May 2025 – November 2025
- Built a transparent fare and mileage prediction system, engineering features such as vehicle age and AC usage.
 - Achieved a 40% reduction in RMSE compared to baseline pricing models through iterative model tuning.
 - Deployed models using FastAPI and Streamlit and developed driver face recognition using OpenCV.
- PWOC, Punjab Engineering College** — *Open Source Contributor* March 2025 – April 2025
- Developed a hybrid DenseNet + NASNet model for the classification of knee osteoarthritis.
 - Implemented EfficientNetB3 benchmarking with data augmentation and fine-tuning.
 - Evaluated model performance using accuracy, precision, recall, and F1-score.
- Plasmid Innovation Pvt. Ltd.** — *Machine Learning Intern* June 2024 – August 2024
- Data preprocessing, feature scaling, and exploratory data analysis for ML pipelines.
 - Developed and evaluated machine learning models for research-focused projects.
 - Contributed to a fraud detection system for online payment transactions.

Education

Manipal University Jaipur — B.Tech in CSE (AIML) August 2023 – July 2027
CGPA: 7.8

Skills

Languages: Python, C/C++, HTML, CSS, JavaScript
ML/AI: Linear Regression, CNN, Deep Learning, LLMs, Computer Vision
Tools: Git, GitHub, Colab, VS Code, Jupyter, Linux
Libraries: pandas, NumPy, Matplotlib, Seaborn, scikit-learn, TensorFlow, Keras, Streamlit, FastAPI

Projects

- Ultrasound Nerve Segmentation (Research - Journal)** — Deep Learning
- Hybrid CNN (U-Net encoder + SegNet decoder) for brachial plexus nerve segmentation.
 - Preprocessing, augmentation, and evaluation using medical imaging metrics.
 - Research completed; manuscript ready for journal submission.
- PharmaSage AI – Drug Repurposing (Prototype/Hackathon)** — Python, Streamlit
GitHub
- Agentic AI platform with literature, clinical, patent and market analysis.
 - Interactive Streamlit dashboard with tables, charts, and downloadable PDF reports.
- Online Payment Fraud Detection** — Python, ML
GitHub
- ML models (Logistic Regression, Decision Trees, Random Forest, XGBoost, LSTM) for fraud detection.
 - EDA, feature engineering, and evaluation using Accuracy, Precision, Recall, and F1-score.

Achievements & Certifications

- Winner of two CyberSecurity quizzes (CyberSpace Club); Level 2 in Error Odyssey.
- Certified in DSA (CodeChef), Python (Cisco), SQL (Oracle), Azure AI Fundamentals, Linux (Red Hat).
